

COON RAPIDS MUNICIPAL UTILITIES
Qualifying Facility Application and Agreement Fee Schedule
Effective: July 1, 2015

	100 kW and Under	Above 100 kW
Fee paid with Application:		
Administrative Processing	\$95	\$185
Engineering Review of Proposed Interconnection	\$350	\$550
Sub-total Application Fee	\$445	\$735
Fees paid with Agreement for Electric Service and Interconnection		
Billing Setup and Configuration	\$50	\$100
Metering Equipment & Installation	* To be determined	* To be determined
Distribution System Improvements Required by Interconnection	* To be determined after completion of engineering review.	* To be determined after completion of engineering review.
Site Visit and Final Inspection Before Authorizing Generation Facility to be Energized	\$65	\$150
Sub-total Agreement Fees:	To be determined	To be determined
Total QF Application and Agreement Fees:	To be determined	To be determined

Definitions:

Administrative Processing: Includes costs associated with creation, maintenance, review and completion of QF required documentation with customer.

Engineering Review: Includes site visit (if necessary), engineering evaluation of interconnection (i.e. line fault data, sectionalizing faults, capacity of existing line & transformer, disconnect switch location, safety requirements, design of metering equipment, etc.) and recommended changes.

Billing Setup & Configuration: Includes setup of billing account and files.

Metering Equipment & Installation: Includes costs of designed metering equipment package – including telemetry equipment (i.e. cellular, RF or IP-based communications equipment) and installation as required by CRMU.

Distribution System Improvements: All costs associated with any distribution system improvements as identified in the engineering evaluation to accommodate the requested interconnection. All projects 150 kW and larger may be subject to costs associated with interconnection and accreditation studies as required by local and regional planning authorities and/or local and regional interconnected transmission companies.

Site Visit and Final Inspection: Includes cost to inspect QF facility for compliance with all standards and requirements prior to authorizing generation facility to be energized.
