Applicability Detail

Available to any commercial and industrial customer at one location at 60 Hertz, single phase and/or three phase service through one meter at the secondary voltage available at the customer's location and CRMU deems that the customer uses, or will use, sufficient amounts of service to justify demand metering. A commercial enterprise is defined as a property classified as commercial or intended for commercial use and/or providing goods/services for resale to the general public. An industrial enterprise is defined as one making/creating (manufacturing) tangible goods for resale. Service under this rate schedule applies to, but is not limited to, electric heating service for manufacturing facilities/foundries, warehouses/distribution facilities, retail/grocery stores, convenience stores, apartment complexes, office buildings and office spaces. Depending on the service size and load requirements, this rate schedule may also be applied to restaurants, assembly shops, laboratories, concrete mixing and manufacture, and machine shops.

Determination of Billing Demand

The billing demand shall be the customer's greatest 15-minute demand, in kilowatts, incurred during the month for which the bill is rendered, but no less than 65% of the highest billing demand during the preceding 11 months.
