Applicability Detail

Available to any commercial or light industrial enterprise, at one location, that, in the opinion of CRMU, has a single meter demand load of 50 KW or less in any one month. In such cases, energy only is metered and billed. Demand rate schedules may be applied if CRMU deems that a customer uses, or will use, a sufficient amount of service to justify demand metering. A commercial enterprise is defined as a property classified as commercial or intended for commercial use and/or providing goods/services for resale to the general public. A light industrial enterprise is defined as one making/creating (manufacturing) tangible goods for resale. Service under this rate schedule applies to multiple family dwellings (two or more units) served through one common meter or a single meter which provides service to at least one dwelling unit and building common areas such as hallway lights, laundry houses, service to separately metered residential-based structures where there is no dwelling unit (garages, barns, pumps, etc.).

Depending on the service size and load requirements, this rate schedule may also be applied to small/medium warehouses, storage buildings/complexes, office buildings and office spaces, restaurants, convenience stores, assembly shops, laboratories, concrete mixing and manufacture, machine shops, churches, public/private schools, non-profit housing served through a single meter, etc.
