Applicability Detail

Available to any commercial or industrial enterprise, at one location, where natural gas service is available from the gas distribution system and whose average annual natural gas requirement is more than 25,000 MCF.

A commercial enterprise is defined as a property classified as commercial or intended for commercial use and/or providing goods/services for resale to the general public. A light industrial enterprise is defined as one making/creating (manufacturing) tangible goods for resale. Service under this rate schedule applies to multiple family dwellings (two or more units) served through one common meter or a single meter which provides service to at least one dwelling unit and building common areas such as hallway lights, laundry houses, service to separately metered residential-based structures where there is no dwelling unit (garages, barns, pumps, etc.).

Depending on the service size and load requirements, this rate schedule may also be applied to small/medium warehouses, storage buildings/complexes, office buildings and office spaces, restaurants, convenience stores, assembly shops, laboratories, concrete mixing and manufacture, machine shops, churches, public/private schools, non-profit housing served through a single meter, etc.

The natural gas will contain a heating value of approximately 1,000 BTU per cubic foot.
